

Only 3 Days of Grace Will the Hoosiers Last That Long?

Sale ends to-morrow if the balance is taken. No Hoosier orders accepted by telephone. Pay only \$1 when you pick out your Hoosier. Pay the balance \$1 weekly—only 5c a meal. Your money back if you are not delighted.

The Hoosier Co. has sent us word that we may take until Saturday to conclude our clearance, but it seems impossible for our stock to last that long. At the present rate, all will be gone to-morrow night!

The women who'll get these bargains are those who don't take chances, but come without fail on Tuesday.

All you ladies who do not have a kitchen cabinet will freely admit that you'd like to have a Hoosier. Isn't

that so? And isn't it true that you'd like to get it before the price goes up? The raise takes effect the instant the few remaining Hoosiers are sold.

Isn't it a fact that you can easily manage to pay \$1 a week—only 5 cents a meal? Then what can possibly prevent you from seizing this golden opportunity?

Resolve right now, as you read this warning, to get one of these last Hoosiers while you can. All your days you'll be glad you had courage to act.

The Hoosier Cabinet is a Labor-Saving Machine, a Kitchen System and Germ-Proof Food Container combined. All features have been certified by the Hoosier Council of Kitchen Scientists, composed of the leading household authorities.

It saves about two miles of walking a day, according to one great expert.

The Hoosier Company has held out the last against a war-time raise. Now the time has come when Hoosiers, too, must be increased.

Before that happens you have this chance to buy at the old-time price.

Have a beautiful Hoosier—an orderly kitchen—with half the steps, and half the work. All your life, you'll enjoy it every day. Get it to-morrow without fail.

Production of Strontium in 1917.

Domestic mines produced approximately 4,000 short tons of strontium ore in 1917, according to figures compiled by the United States geological survey, department of the interior—a very large increase in the domestic production of this relatively unknown ore. The imports of English celestine, an ore of strontium, in 1917 amounted to 1,700 tons. From the foreign and domestic ores about 1,500 short tons of strontium carbonate and nitrate, besides a few thousand pounds of other salts, were made.
